Hiring Manager

Ernst & Young Global Delivery Services (EY GDS)

[Office Location, e.g., Noida / Gurugram]

Subject: Application for the position of [Job Title]

Dear Hiring Manager,

I'm applying for the [Job Title] role at EY Global Delivery Services. I'm currently an Associate Consultant at KPMG India and was previously a Contract Manager at EXL Service. Across both roles I've built more than three years of experience in contract lifecycle management, third-party risk management and procurement compliance. I'd like to bring that experience to EY GDS and contribute to its purpose of *Building a better working world*.

At KPMG India, I handle end-to-end contract remediation to bring agreements in line with regulatory requirements, including OCIR, DTA and data privacy obligations. I work with sourcing, supplier management and legal teams to update third-party contracts. I also review and negotiate supplier risks with SMEs and make sure contracts follow Supplier Control Obligations (SCOs) and governance frameworks. My other responsibilities include:

- Supporting RFPs, RFXs and vendor negotiations to get the best balance of value, risk and compliance.
- Screening third-party vendors for risk in depth before onboarding, and monitoring contract controls, audits and data quality across procurement cycles.
- Managing Tax Engagement Letters with multiple member firms to make sure the recharge policy is followed, and handling everything from simple purchase order requests to complex Member Firm Agreements.
- Driving process improvements and buying-channel optimization, and presenting project progress, key risks and themes to stakeholders.

At EXL Service, I managed the full contract lifecycle, from drafting and negotiation through to execution. I worked with external parties and internal review teams, and kept contract records accurate, well indexed and easy to audit. That role gave me a strong eye for contract terms and the discipline that high-volume contract operations need.

My legal education underpins this work. I hold an LL.M. in Constitutional Law from Amity University and a B.A. LL.B. (Hons) from NERIM Law College, Guwahati, both with First Class. During internships at the Supreme Court of India and the Gauhati High Court, I learned how to analyze contract terms carefully and interpret risk. I also work hands-on with leading contract and procurement tools, including **Icertis, ServiceNow, Coupa, Oracle Fusion, Microsoft D365 and PowerApps**, and I'm comfortable with benchmarking and data-driven contract analysis.

EY GDS appeals to me because of its global scale, its investment in technology-enabled legal and procurement services, and its commitment to developing its people. I'm confident that my legal background, practical contract management experience and familiarity with enterprise tools would let me add value to your clients and teams from day one.

Thank you for considering my application. I'd welcome the chance to discuss how my skills and experience fit the needs of your team. You can reach me at +91 9678280183 or rupalimbora@outlook.com.

Yours sincerely,

Rupalim Bora
